EDM930/960 SQR Release Notes

Version 1.20.532.001

Changes in this version include:

• VGA Display improvements (support multiple display panels)

• Fixes a RAD message "floating point rounding error" to ensure that RAD and EDM Scanner Area display the same value

• Fixes AMPS1/AMPS2 data dropouts in Datalog file output. This corrects AMPS1/AMPS2 dropouts in EzTrends view

• Restored TACH TIME data to Datalog file output to allow EzTrends to display Aircraft TACH Time at the top of the "Main" page

• RPM, MAP, OAT, and BAT are now displayed in the Scanner
